## Silver Bullet 2.2

The SB2.2 is a spun aluminum ball-bearing yo-yo with an adjustable string gap, rim-weighted for maximum spin. Why an adjustable gap? This allows you to tune your yo-yo. You can make it sleep better, or you can make it loop better. You can customize the string gap to suit your needs, making your yo-yo distinctly for YOU! Unlike most adjustable string gap yo-yos, the SB2.2 will not slip out of adjustment when thrown, but stays firmly in place. The SB2.2 was designed in part for NASA and it became the first yo-yo in space! It comes in a gift box with flight manual, strings, velvet pouch, and a string gap tool. The Original Silver Bullet 2.2 is silver aluminum in color, the SB2.2 anodized is available in a red, gold, blue and violet or you can get the spectrum colors for that extra touch of elegance (infra-red, gamma green, ultra-violet, sunset, and microburst.)
